

LRV Delivery & Storage Facility Readiness

January 2019 - May 2021

Light rail vehicle (LRV) delivery and the readiness of the Mount Dennis maintenance and storage facility are proceeding in parallel with the civil construction program.

The first LRVs moved onto the property at Rosemount Dr. starting May 25, 2021, ahead of on-alignment testing.

Vehicle delivery has experienced its own schedule pressure separate from the civil works - an early contractual test-car delivery milestone originally due in 2014 slipped by several years.
